Chennai, TN — +91 9360101660 — shanttoosh@gmail.com — LinkedIn — GitHub

PROFESSIONAL SUMMARY

AI-focused Computer Science graduate with hands-on experience in AI-driven development, backend engineering, and scalable system design. Strong foundation in Python, SQL, RESTful APIs, and multi-agent LLM systems, building production-ready AI applications with optimized performance, semantic retrieval, and secure data workflows.

EDUCATION

MEENAKSHI COLLEGE OF ENGINEERING **Chennai, TN**
Bachelor of Engineering in Computer Science, Cumulative GPA: 7.62 / 10 *Oct 2021 – May 2025*

WORK EXPERIENCE

KRION CONSULTING PVT LTD **Chennai, TN**
AI Developer *Dec 2025 – Present*

- Engineered an AI-powered SQL Assistant delivering secure, role-aware natural language analytics by designing a hybrid AI system combining deterministic query routing with LangChain-based multi-agent reasoning.
- Implemented schema-aware NL2SQL generation with validation loops, semantic caching, and vector-based context retrieval to ensure accurate and reliable query execution.
- Delivered end-to-end solutions using NestJS, FastAPI (Python), PostgreSQL, React, and TypeScript, reducing average query response latency by 20% through hybrid routing, semantic caching, and validation optimization.

IOPEX TECHNOLOGIES **Chennai, TN**
AI/ML Intern *July 2025 – Oct 2025*

- Led a 6-member team; architected an end-to-end chunking optimizer supporting 5 chunking strategies and 4 execution modes, improving retrieval accuracy and context relevance across diverse document types.
- Built high-throughput embeddings pipeline (sentence-transformers) using 6-worker parallelism; ~60s per 100K rows; delivered RAG-ready semantic search via FAISS/Chroma, cosine similarity, and metadata filters.
- Developed OpenAI-compatible REST APIs with LangChain-orchestrated pipelines (core), LLM-agnostic integration-OpenAI, and a React UI for seamless uploads, search, and results visualization.

VELOZITY GLOBAL SOLUTIONS **Chennai, TN**
Machine Learning Intern *Feb 2025 – Apr 2025*

- Developed a signal preprocessing pipeline to enhance clarity through noise filtering and baseline correction. Included heartbeat segmentation to enable accurate downstream analysis.
- Implemented advanced ECG visualization techniques to enhance signal interpretation and analysis. Included PQRST annotation, spectrogram analysis, and phase space plotting for deeper insight.
- Collected, formatted, and validated ECG datasets to ensure high-quality input for machine learning models.

PROJECTS

AI AGENCY SCRAPER & ENGAGEMENT BOT — Link *2026*

- Built a full-stack AI agency prospecting pipeline in n8n: Apify-powered hashtag and keyword scraping across Instagram and X, lead scoring (0–100) using follower count, engagement rate, and bio-keyword signals, and automated deduplication capped at 100 qualified leads per platform per day.
- Engineered a Groq (Llama 3 70B) DM generation workflow with rate-limit-safe randomised delays (30s–3.5 min), multi-step follow-up sequencing triggered after 3-day silence windows, and event-detection polling for bio updates and new posts.
- Delivered daily automated reports to Google Sheets and email summarising follows, DMs, replies, and conversion rate; built a live HTML dashboard with real-time funnel visualisation and lead activity feed.

AI POWERED LEGAL DOCUMENT ANALYZER — Link *Feb 2025 – May 2025*

- Built an OCR pipeline using Tesseract for text extraction and applied NLP for Named Entity Recognition, along with template matching using OpenCV and ORB/SIFT descriptors for accurate document validation.
- Developed a RAG-based compliance verification system using LangChain and FAISS to automate structured document analysis and streamline validation workflows.

SKILLS

Programming & Development: Python, SQL, JavaScript, TypeScript, Node.js, REST APIs
Frameworks & Libraries: FastAPI, React, NestJS, Scikit-learn, TensorFlow, OpenCV, LangGraph, LangChain
Automation & AI Workflows: n8n, Prompt Engineering, AI agent pipelines, webhook integrations, Process Mapping, MCP, A2A
Databases: MySQL, PostgreSQL, BigQuery, Vector Databases
Tools & Platforms: Git, GitHub, Docker, Postman, Excel, Tableau, AWS

CERTIFICATIONS

- Google Analytics Certification (92%) — Link
- Google Data Analytics Professional Certificate (Coursera) — Link
